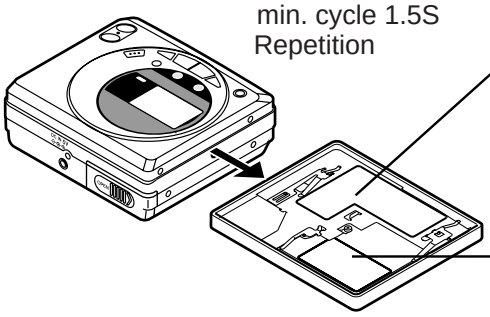
SAFETY PRECAUTION FOR SERVICE MANUAL (MD-MT15W/15H/18H/161E ONLY)

Precaution to be taken when replacing and servicing the Laser Pickup.

The AEL (Accessible Emission Level) of Laser Power Output for this model is specified to be lower than Class I Requirements. However, the following precautions must be observed during servicing to protect your eyes against exposure to the laser beam.

(1) When the cabinet has been removed, the power is turned on without a compact disc, and the Pickup is on a position outer than the lead-in position, the Laser will light for several seconds to detect a disc. Do not look into the Pickup Lens.
(2) The Laser Power Output of the Pickup inside the unit and replacement service parts have already been adjusted prior to shipping.
(3) No adjustment to the Laser Power should be attempted when replacing or servicing the Pickup.
(4) Under no circumstances look directly into the Pickup Lens at any time.
(5) CAUTION - Use of controls or adjustments, or performance of procedures other than those specified herein may result in hazardous radiation exposure.

Laser Diode Properties
- Material: GaAIAs
- Wavelength: 785 nm
- Pulse time:
  Read mode; 0.8 mW Continuous
  Write mode; max. 10 mW 0.5S
  min. cycle 1.5S
  Repetition



CAUTION-INVISIBLE LASER RADIATION WHEN OPEN AND INTERLOCKS DEFEATED.
AVOID EXPOSURE TO BEAM.
VARNING-OSYNLIG LASERSTRÅLNING NÄR DENNA DEL ÄR ÖPPNAD OCH SPÄRRAR ÄR URKOPPLADE. STRÅLEN ÄR FARLIG.
ADVARSEL-USYNLIG LASERSTRÅLING NÅR DEKSEL ÅPNES OG SIKKERHEDSLÅS BRYTES. UNNGÅ EKSPONERING FOR STRÅLEN.
VARO! AVATTAESSA JA SUOJALUKITUS OHITETTAESSA OLET ALTTIINA NÄKYMÄTÖN LASERSÄTEILYLLE. ÄLÄ KATSO SÄTEESEEN.
VARNING-OSYNLIG LASERSTRÅLING NÄR DENNA DEL ÄR ÖPPNAD OCH SPÄRREN ÄR URKOPPLAD. BETRAKTA EJ STRÅLEN.
ADVARSEL-USYNLIG LASERSTRÅLING VED ÅBNING, NÅR SIKKERHEDSAFBRYDERE ER UDE AF FUNKTION. UNDGÅ UDSÆTTELSE FOR STRÅLING.

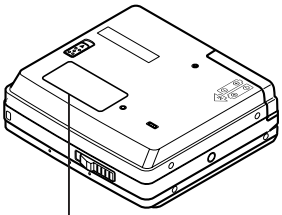
For MD-MT15H/18H

CAUTION

- This Portable MiniDisc Recorder is classified as a CLASS 1 LASER product.
- The CLASS 1 LASER PRODUCT label is located on the bottom.
- Use the Portable MiniDisc Recorder only in accordance with the instructions given in this manual and do not attempt to interfere with the interlock switch or make any other adjustment as this may result in exposure to hazardous radiation.

For MD-MT15W



For MD-MT161E

VARO !	Avattaessa ja suojalukitus ohitettaessa olet alttiina näkymättömälle lasersäteilylle. Älä katso säteeseen.
VARNING!	Osynlig laserstralning när denna del är öppnad och spärren är urkopplad. Betrakta ej strålen.

Precaution to be taken when replacing and servicing the laser pickup.
The following precautions must be observed during servicing to protect your eyes against exposure to the laser.
Warning of possible eye damage when repairing:
If the AC adaptor or batteries are connected when the top housing (disc cover) of the unit is removed, and the PLAY key is pressed, the laser will light up during focus access (2-3 seconds). (Fig. 2-1) During the operation, the laser will leak from the opening between the magnetic head and the mechanical chassis (Fig. 2-2). In order to protect your eyes, you must not look at the laser during repair. Before repairing be sure to disconnect the AC adaptor and remove the batteries.

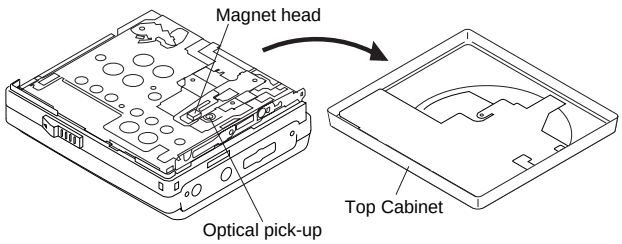


Figure 2-1

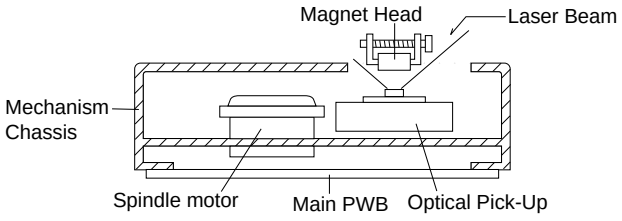

Figure 2-2

FOR A COMPLETE DESCRIPTION OF THE OPERATION OF THIS UNIT, PLEASE REFER TO THE OPERATION MANUAL.

SPECIFICATIONS

MD-MT15/15C

■ General

Power source:
DC 5V: AC adaptor (AC 120V, 60 Hz)
DC 3.0V: Commercially available, "AA" size (LR6), alkaline battery x 2
DC 2.4V: Optional Rechargeable Nickel-Metal Hydride battery (AD-T20BT) x 1
DC 4.5V: Optional car adaptor, AD-CA20X (for cars with a 12-24V DC negative ground electrical system)

Power consumption: 7.5 W (AC adaptor)

Output power: RMS; 20 mW (10 mW + 10 mW) (0.2% T.H.D.)

Charging time: Approx. 4 hours (90 %)
Approx. 6 hours (fully charged)
(When using the AC adaptor included with the unit)

Battery life:

When using two, commercially available, high capacity, "AA" size (LR6), alkaline batteries	When using the optional rechargeable battery AD-T20BT (fully charged)
Continuous recording: Approx. 7.5 hours	Continuous recording: Approx. 7.5 hours
Continuous play: Approx. 15 hours	Continuous play: Approx. 12 hours

- The continuous recording time is for analog inputs when the volume level is set to "VOL 0".
- The continuous play time shows the value when the volume level is set to "VOL 15".
- The above values are the standard values when the unit is charged and used at an ambient temperature of 68°F (20°C).
- The operating time when using an alkaline battery may be different, depending on the type and manufacturer of the battery, and on the operating temperature.

Input sensitivity:

Recording level	Reference input level	Input impedance
MIC H	0.25 mV	10 k ohms
MIC L	2.5 mV	10 k ohms
LINE	100 mV	20 k ohms

Output level:

	Specified output	Maximum output level	Load impedance
Headphones	—	10 mW + 10 mW	16 ohms
LINE	250 mV (-12dB)	—	10 k ohms

Dimensions: Width: 3-7/16" (87.9 mm)
Height: 1-3/16" (29.8 mm)
Depth: 3-1/8" (79.7 mm)

Weight: 0.40 lbs. (180g) without battery

Input jack: Line/optical digital, microphone (powered by the main unit)

Output jack: Headphones (impedance: 19 ohms)

■ MiniDisc Recorder

Type: Portable MiniDisc recorder

Signal readout: Non-contact, 3-beam semi-conductor laser pick-up

Audio channels: Stereo 2 channels/monaural (long-play mode) 1 channel

Frequency response: 20 – 20,000 Hz (± 3 dB)

Rotation speed: Approx. 400 – 900 rpm

Error correction: ACIRC (Advanced Cross Interleave Reed-Solomon Code)

Coding: ATRAC (Adaptive Transform Acoustic Coding), 24-bit computed type

Recording method: Magnetic modulation overwrite method

Sampling frequency: 44.1 kHz (32 kHz and 48 kHz signals are converted to 44.1 kHz, and then recorded.)

Wow and flutter: Unmeasurable (less than ±0.001% W. peak)

MD-MT15H/18H/161E

Output level:

	Specified output	Maximum output level	Load impedance
Earphones	—	10 mW + 10 mW	32 ohms
LINE	250 mV (-12dB)	—	10 k ohms

Dimensions: Width: 87.9 mm (3-7/16")
Height: 29.8 mm (1-3/16")
Depth: 79.7 mm (3-1/8")

Weight: 180g (0.40 lbs.) without battery

Input socket: Line/optical digital, microphone (powered by the main unit)

Output socket: Earphones (impedance: 32 ohms)

MD-MT15H

Power source:
DC 3.0V: Commercially available, "AA" (LR6) size, alkaline battery x 2
DC 2.4V: Optional Rechargeable Nickel-Metal Hydride battery (AD-T20BT) x 1
DC 4.5V: Optional car adaptor, AD-CA20X (for cars with a 12-24V DC negative earth electrical system)
DC 5V: Optional AC adaptor (AD-T20APH, AC 220 - 230V, 50/60 Hz)

Power consumption: 7 W (Optional AC adaptor)

Output power: RMS; 20 mW (10 mW + 10 mW) (0.2% T.H.D.)

Charging time: Approx. 4 hours (90 %)
Approx. 6 hours (fully charged)
(When using the AC adaptor)

MD-MT161E

Power source:
DC 3.0V: Commercially available, "AA" size (LR6), alkaline battery x 2
DC 2.4V: Optional Rechargeable Nickel-Metal Hydride battery (AD-T20BT) x 1
DC 4.5V: Optional car adaptor, AD-CA20X (for cars with a 12-24V DC negative earth electrical system)
DC 5V: Optional AC adaptor (AD-T20APE, AC 230 - 240V, 50/60 Hz)

Power consumption: 7 W (Optional AC adaptor)

Output power: RMS; 20 mW (10 mW + 10 mW) (0.2% T.H.D.)

Charging time: Approx. 4 hours (90 %)
Approx. 6 hours (fully charged)
(When using the AC adaptor)

MD-MT18H

Power source:
DC 5V: AC adaptor (AC 220 - 230V, 50/60 Hz)
DC 3.0V: Commercially available, "AA" (LR6) size alkaline battery x 2
DC 2.4V: Optional Rechargeable Nickel-Metal Hydride battery (AD-T20BT) x 1
DC 4.5V: Optional car adaptor, AD-CA20X (for cars with a 12-24V DC negative earth electrical system)

Power consumption: 7 W (AC adaptor)

Output power: RMS; 20 mW (10 mW + 10 mW) (0.2% T.H.D.)

Charging time: Approx. 4 hours (90 %)
Approx. 6 hours (fully charged)
(When using the AC adaptor included with the unit)

MD-MT15W

Power source: DC 3.0V [Commercially available, "AA" size (LR6), alkaline battery x 2]
DC 4.5V [Optional car adaptor, AD-CA20X (for cars with a 12-24V DC negative earth electrical system)]

Output power: RMS; 20 mW (10 mW + 10 mW) (0.2% T.H.D.)

Battery life:

When using two, commercially available, high capacity, "AA" size (LR6), alkaline batteries
Continuous recording: Approx. 7.5 hours
Continuous play: Approx. 15 hours

- The continuous recording time is for analogue inputs when the volume level is set to "VOL 0".
- The continuous play time shows the value when the volume level is set to "VOL 15".
- The above values are the standard values when the unit is used at an ambient temperature of 20°C (68°F).
- The operating time when using alkaline batteries may be different, depending on the type and manufacturer of the battery, and on the operating temperature.

Input sensitivity:

Recording level	Reference input level	Input impedance
MIC H	0.25 mV	10 k ohms
MIC L	2.5 mV	10 k ohms
LINE	100 mV	20 k ohms

Output level:

	Specified output	Maximum output level	Load impedance
Earphones	—	10 mW + 10 mW	32 ohms
LINE	250 mV (-12dB)	—	10 k ohms

Dimensions: Width 87.9 mm (3-7/16")
Height 29.8 mm (1-3/16")
Depth 79.7 mm (3-1/8")

Weight: 180 g (0.40 lbs.) without battery

Input socket: Line/optical digital, microphone (powered by the main unit)

Output socket: Earphones (impedance: 32 ohms)

Specifications for this model are subject to change without prior notice

POWER SOURCE

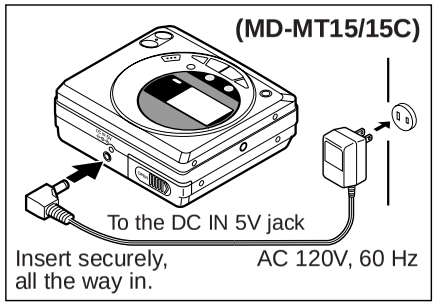
You can power this unit with AC adaptor or commercially available alkaline batteries (LR6, "AA" size).
You can also power this unit with a rechargeable battery (AD-T20BT) or car adaptor (AD-CA20X) which are available separately.

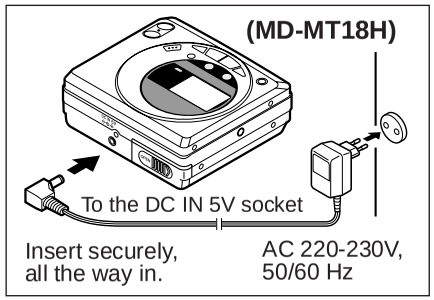
■ AC power (For MD-MT15/15C/18H)

1 Connect the cord from the AC adaptor to the DC IN 5V jack on the unit.

2 Plug the AC adaptor into an AC outlet.

Notes:
- When there is thunder or lightning in your vicinity, unplug the AC adaptor from the AC outlet.
- When the unit is not in use for extended periods, remove the AC adaptor from the AC outlet.
- Never use an AC adaptor other than the one specified. Otherwise, problems or serious hazards may be created.
- Do not bend, twist or tie the power cord or put heavy objects on top of it.
- Be sure to hold the plug when removing it. If you pull on the cord, it may break, or the unit may malfunction.





- **AC adaptors of MD-MT15H/15W/161E are option parts.**

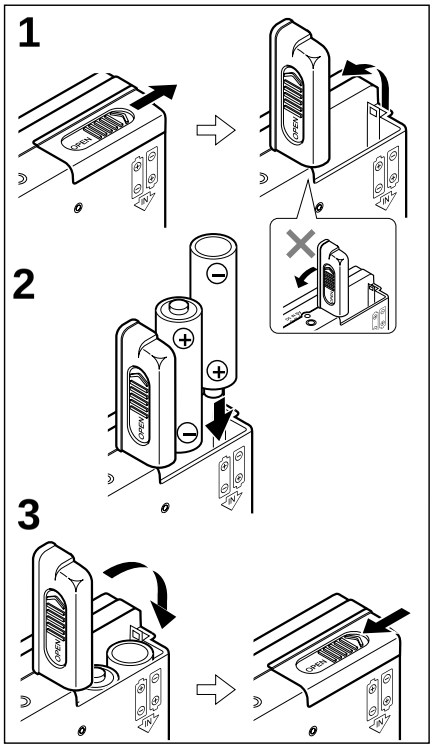
■ Alkaline batteries power

- Use two commercially available alkaline batteries (LR6, "AA" size).

1 Open the battery cover.
- Slide the battery cover as far as it will go to the outside and then lift to open it. If the battery cover is lifted without being slid all the way out, it may break.

2 Insert two alkaline batteries according to the polarity marked on the bottom of the unit.
- Installing the batteries incorrectly may cause the unit to malfunction.

3 Close the battery cover.



RECORDING USING THE OPTICAL DIGITAL CABLE

This is the method used for recording digital signals from CDs exactly as they are stored on the original. Compared to recordings made from analog inputs, digital recordings have extremely high-quality sound.

1 Connect the external equipment.

2 Start recording.

Synchro recording:

Before starting a synchro recording, perform the following steps on the equipment connected to this unit.
(1) First, put it in the playback mode.
(2) Next, put it in the pause mode.
(3) Finally, position it at the beginning of the track you want to record.

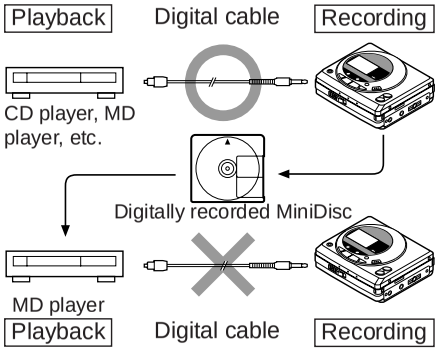
(1) Insert a recordable MiniDisc, and then press the REC button.
(2) Press the ENTER/SYNC button.
(3) Start the playback on the equipment connected to this unit.

Manual recording:
(1) Insert a recordable MiniDisc, and then press the REC button.
(2) Press the 06 button.

- When recording from digital inputs, it is not necessary to adjust the recording level.

There are cases where digital recording may be impossible.
In the following cases digital recording is impossible, even if you are using digital cables.

When you attempt to make a new digital recording from a track that was digitally recorded on a MiniDisc.
- MiniDiscs are designed so that only first generation digital copies can be made. Further digital copies are prevented by the SCMS (Serial Copy Management System).



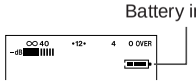
Analog recording is possible.

Notes:
- This unit incorporates a sampling rate converter.
  When this unit is connected to digital equipment such as a DSS tuners or a DAT tape recorder that use a different sampling frequency (32 kHz or 48 kHz), recordings can still be made. (The sampling frequency of this unit is 44.1 kHz.)
- When making a digital recording from a portable CD player (if the player has a sound skip prevention function and this function is turned on) the optical output will drop out and digital recording will not be possible. Be sure to turn the sound skip prevention function off.

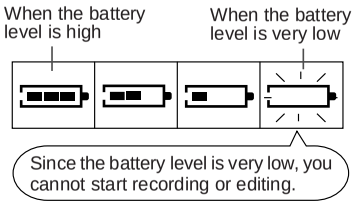
CONVENIENT OPERATION OF THE UNIT

■ Checking the remaining amount of battery level

The remaining amount of battery level is shown by the battery indicator ( ) during operation.



< How to read the battery indicator >



When the battery level is high
When the battery level is very low
Since the battery level is very low, you cannot start recording or editing.

- When the battery is completely discharged, the battery indicator will flash. Recharge the battery or replace the alkaline batteries with new ones.
- When the battery has run completely out, "BATT EMPTY" will appear. Then, the power will be disconnected automatically.

Notes:

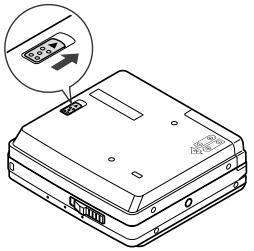
- When using the unit with alkaline batteries or a rechargeable battery, the battery indicator will not correctly display the remaining capacity for approximately 10 seconds after the power has been turned on.
- When an AC adaptor or a car adaptor is used, the battery indicator will not be shown.
- The number of bars shown in the battery indicator may increase or decrease, depending on the operation being performed. This is normal.

■ To prevent the unit from being operated by mistake

To avoid accidental operation of the unit, use the hold function.

Move the HOLD switch to the safety position (direction indicated by the arrow).

- When the unit is in the hold mode, pressing the buttons will have no affect.



- To cancel the hold mode, move the HOLD switch away from the safety position (the opposite direction of the arrow).

If the hold function is active while the power is turned off, the power cannot be turned on by mistake and the battery will not be accidentally drained.

TROUBLESHOOTING

■ Moisture condensation

In the following cases, condensation may form inside the unit.

- Shortly after turning on a heater.
- When the unit is placed in a room where there is excessive steam or moisture.
- When the unit is moved from a cool place to a warm place.

When the unit has condensation inside, the disc signals cannot be read, and the unit may not function properly.

- If this happens, remove the disc. The condensation should evaporate in approximately 1 hour. The unit will then function properly.

Many potential "problems" can be resolved by the owner without calling a service technician.
If something seems to be wrong with this product, check the following before calling your authorized SHARP dealer or service center.

PROBLEM	CAUSE
The unit does not turn on.	● Is the AC adaptor disconnected? ● Is the battery exhausted? ● Is the unit in the hold mode? ● Has condensation formed inside the unit? ● Is the unit being influenced by mechanical shock or by static electricity?
No sound is heard from the headphones.	● Is the volume set too low? ● Is the headphones plugged in? ● Are you trying to play a MiniDisc with data on it instead of a MiniDisc containing music?
When the operation buttons are pressed, the unit does not respond.	● Is the unit in the hold mode? ● Is the battery exhausted?
Some sounds are skipped.	● Is the battery exhausted? ● Is the unit being subjected to excessive vibration?
The MiniDisc cannot be ejected.	● Has the track number or character information been written on the disc yet? ● Is the unit in the recording or editing mode?
Recording and editing are impossible.	● Is the MiniDisc protected against accidental erasure? ● Is the unit connected properly to the other equipment? ● Is the AC adaptor unplugged or did a power failure occur while recording or editing? ● Is the unit in the hold mode? ● Is an optical signal being output from the external equipment? Read the operation manual for the external equipment.

■ If trouble occurs

When this product is subjected to strong external interference (mechanical shock, excessive static electricity, abnormal supply voltage due to lightning, etc.) or if it is operated incorrectly, it may malfunction.
If such a problem occurs, do the following:

1. Unplug the AC adaptor from the AC outlet.
2. Remove the battery.
3. Leave the unit completely unpowered for approximately 30 seconds.
4. Plug the AC adaptor back into the AC outlet and retry the operation.

If strange sounds, smell or smoke come out of the unit or an object is dropped into the unit, remove the AC adaptor from the AC outlet immediately and contact an authorized SHARP service center.

MINIDISC SYSTEM LIMITATIONS

MiniDiscs are recorded using a different system than is used for cassette tapes or DAT recordings. Therefore, the following conditions may be encountered, depending on how the disc has been recorded or edited. These are due to system limitations, and should be considered normal.

Even if the maximum recording time of a MiniDisc has not been reached, "DISC FULL" or "TOC FULL" may be displayed.	When the number of tracks used reaches the limit, regardless of the remaining recording time, further recording will be impossible. (Maximum number of tracks: 255) If a MiniDisc has been recorded or edited repeatedly or if a MiniDisc has scratches on it, it may not be possible to record the maximum number of tracks on it.
Even if the number of tracks and the recording time have not reached the limit, "DISC FULL" may be displayed.	If there are scratches on a disc, the unit will automatically avoid recording in those areas. The recording time will be reduced.
Even if several short tracks are erased, the remaining recording time may not show an increase.	When the remaining recording time of a disc is displayed, short tracks less than 12 seconds long may not be included in the total.
Two tracks may not be combined in editing.	For MiniDiscs on which repeated recording and editing operations were performed, the COMBINE function may not work.
The total of the recorded time and time remaining on a disc may not add up to the maximum possible recording time.	A cluster (about 2 seconds) is normally the minimum unit of recording. So, even if a track is less than 2 seconds long, it will use about 2 seconds of space on the disc. Therefore, the time actually available for recording may be less than the remaining time displayed. If there are scratches on discs, those sections will be automatically avoided (no recording will be placed in those sections). Therefore, the recording time will be reduced.
When recorded tracks are played back using the cue and review operations, some sounds may be skipped.	For MiniDiscs on which repeated recording and editing were performed, some sounds may be skipped while cueing and reviewing.
A track number can be created in the middle of a track.	If there are scratches or dust on a MiniDisc, the track numbers following that track will be increased by one.

ERROR MESSAGES

Error messages	Meaning	Remedy
BATT EMPTY	● The battery is run down.	● Charge the rechargeable battery or replace the alkaline batteries (or use the AC adaptor for power).
BLANK DISC	● Nothing is recorded.	● Replace the disc with a recorded disc.
Can't COPY	● No copy can be made because of the SCMS copyright system.	● Record using the analog cable.
Can't EDIT	● A track cannot be edited.	● Change the stop position of the track and then try editing it.
Can't REC	● Recording cannot be performed correctly due to vibration or shock in the unit.	● Re-record or replace it with another recordable disc.
Can't WRITE	● Editing is impossible.	● Check the number of tracks.
DEFECT	● The disc is scratched.	● If the sound you hear is not right, try recording again. ● Replace the disc with another recordable disc.
Din UNLOCK	● Poor connection of the digital cable.	● Connect the digital cable securely.
DISC FULL	● The disc is out of recording space.	● Replace it with another recordable disc.
HOLD	● The unit is in the hold mode.	● Return the HOLD switch to its original position.
LOCKED LOCK ERROR	● The OPEN lever was moved during recording or editing.	● Turn off the power and remove the MiniDisc.
NO DISC	● A disc has not been loaded.	● Load a disc.
PB DISC	● You tried to record on a playback-only disc.	● Replace it with a recordable disc.
POWER ?	● Improper power is being supplied.	● Use one of the specified power sources.
PROTECTED	● The MD is write protected.	● Move the write protection knob back to its original position.
READ ERROR	● The disc is damaged.	● Reload the disc or replace it. ● Replace it with another recorded disc.
SORRY	● Since a track number is currently being located or written to, the unit cannot accept your command.	● Wait for a while and try the operation again.
SYSTEM ERR	● You have come to the conclusion that the unit is out of order.	● To have it repaired, go to the distributor where you purchased the unit.
TEMP OVER	● The temperature is too high.	● Turn off the power, and wait for a while.
TOC ERROR	● A large portion of the disc has been damaged.	● Replace it with another recorded disc.
TOC FULL	● There is no space left for recording character information (track names, disc names, etc.).	● Replace it with another recordable disc.
Tr. Protect	● The track has been protected from being erased.	● Edit the track with the device on which it was recorded.
U TOC ERROR	● A large portion of the disc has been damaged. ● There is an error in the recorded signal.	● Replace it with another recorded disc. ● Erase all of the signal errors, and then try recording again.
? DISC	● A disc which contains data other than music was played. ● There is an error in the signal from the disc.	● A disc which contains non-music data cannot be played. ● Replace it with another recorded disc.

Pulse el botón REC.

4 **Press the ⏮ or ⏭ button to adjust the recording level.**
Pulse el botón ⏮ o ⏭ para ajustar el nivel de grabación.

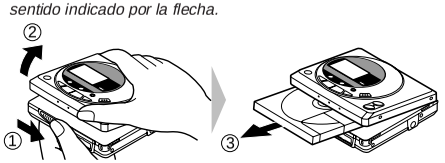
5 ENTER/SYNC **Press the ENTER/SYNC button to select the synchro recording level. (This level can be changed, even while recording.)**
Pulse el botón ENTER/SYNC para seleccionar el nivel de la grabación sincronizada. (Este nivel podrá cambiarse incluso durante la grabación.)

6 **When a sound, such as a person speaking, is picked up by the microphone, recording will begin automatically.**
Cuando el micrófono capte un sonido, el de una persona que hable por ejemplo, la grabación empezará automáticamente.

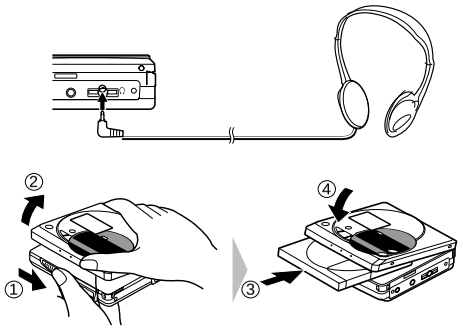
To stop recording:
Para detener la grabación:
Press the ■/:OFF button.
Pulse el botón ■/:OFF.

To turn off the power:
Para desconectar la alimentación:
Press the ■/:OFF button while in the stop mode.
Pulse el botón ■/:OFF estando en el modo de parada.

To remove the MiniDisc:
Para extraer el minidisco:
Turn off the power and move the OPEN lever in the direction indicated by the arrow.
Desconecte la alimentación y mueva la palanca OPEN en el sentido indicado por la flecha.



5 Playing a MiniDisc / *Reproducción de un minidisco*



1 **Insert the headphones plug into the ∩ jack. Push the plug all the way in.**
Inerte la clavija de auriculares en el enchufe ∩. Empuje completamente hacia adentro la clavija.

2 **Insert a MiniDisc.**
Inserte un minidisco.

- The power will be turned on automatically, and playback will start from the first track. (Auto-play function)
- *La alimentación se conectará automáticamente, y la reproducción empezará desde la primera pista. (Función de reproducción automática)*

Playback does not start when a MiniDisc is inserted:
La reproducción no empieza cuando se inserta un minidisco:

Press the ▶II button.
In the following cases, the auto-play function will not work.
- When the recordable MiniDisc write protection tab is closed.
- When the auto-play function has been canceled.

Pulse el botón ▶II .
En los casos siguientes, la función de reproducción automática no se activará.
- *Cuando esté cerrada la lengüeta de protección contra escritura del minidisco grabable*
- *Cuando haya sido cancelada la función de reproducción* automática

To interrupt playback:
Para interrumpir la reproducción:

Press the ▶II button during playback.
- To resume playback, press the ▶II button again.

Pulse el botón ▶II durante la reproducción.
- *Para reanudar la reproducción, pulse de nuevo el botón ▶II .*

To stop playback:
Para detener la reproducción:

Press the ■/:OFF button.
Pulse el botón ■ /:OFF.

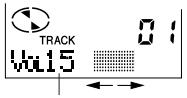
To turn off the power:
Para desconectar la alimentación:

Press the ■/:OFF button while in the stop mode.
Pulse el botón ■ /:OFF estando en el modo de parada.

6 Sound control / *Control del sonido*

Adjust the volume.
Press the VOLUME + button to increase the volume and the VOLUME – button to decrease the volume.

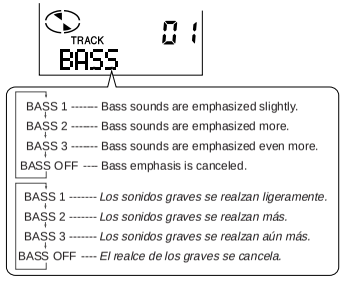
Ajuste el volumen.
Pulse el botón VOLUME + para aumentar el volumen y el botón VOLUME – para reducirlo.



• Volume (0 - 30)
• *Volumen (0 - 30)*

Adjust the bass level.
Each time the BASS button is pressed, the tone will be switched as follows:

Ajuste el nivel de los graves.
Cada vez que pulse el botón BASS, el tono cambiará de la forma siguiente:

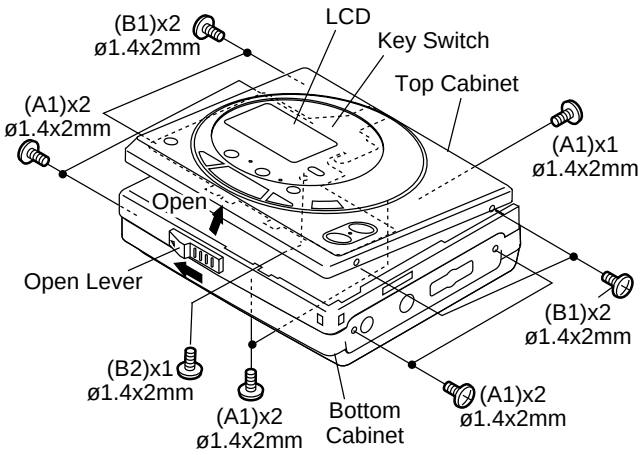


TRACK
01
BASS
BASS 1 ------- Bass sounds are emphasized slightly.
BASS 2 ------- Bass sounds are emphasized more.
BASS 3 ------- Bass sounds are emphasized even more.
BASS OFF ---- Bass emphasis is canceled.
BASS 1 ------- Los sonidos graves se realzan ligeramente.
BASS 2 ------- Los sonidos graves se realzan más.
BASS 3 ------- Los sonidos graves se realzan aún más.
BASS OFF ---- El realce de los graves se cancela.

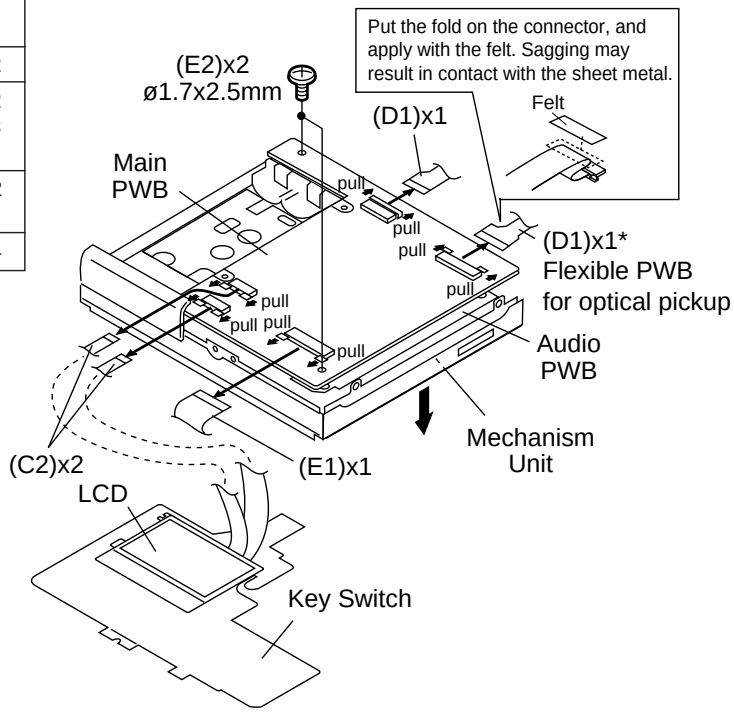
DISASSEMBLY

Cares before disassembling
When assembling the machine after disassembling or repair, observe the following requirements so as to ensure safety and performance.
1. Remove the batteries from the machine, and take out the mini-disc.
2. When assembling after repair, be sure to restore the initial location of wires.
   Since the screws are small, incorrect fixing may result in malfunction.
3. When repairing, pay utmost attention to static electricity of IC.

STEP	REMOVAL	PROCEDURE	FIGURE
1	Bottom Cabinet	1. Screw ..... (A1) x7	10-1
2	Top Cabinet	1. Open the Top cabinet. 2. Screw ..... (B1) x4 3. Screw ..... (B2) x1	10-1
3	Key Switch/LCD	1. Flexible PWB ..... (C1) x2	10-2
4	Mechanism Unit	1. Flexible PWB ..... (D1) x2 2. Raise the rear part, and remove in the arrow direction.	10-2 10-3
5	Main PWB	1. Flat cable ..... (E1) x1 2. Screw ..... (E2) x2	10-2
6	Audio PWB	1. Screw ..... (F1) x3	10-4



Figu re 10-1



Caution:
Carefully handle the main PWB and flexible PWB. After removing the flexible PWB (1*) for the optical pickup from the connector, do not touch directly the front end of flexible PWB with your hand so as to prevent damage of optical pickup by static electricity.

Figure 10-2

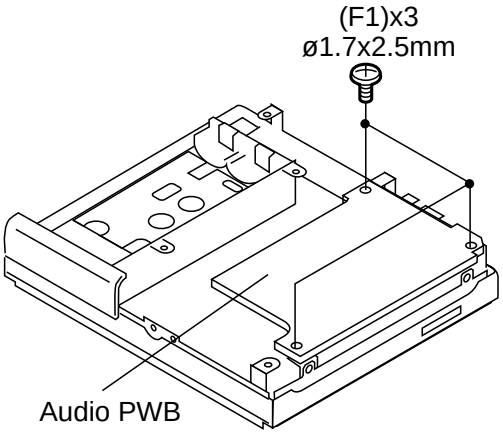


Figure 10-4

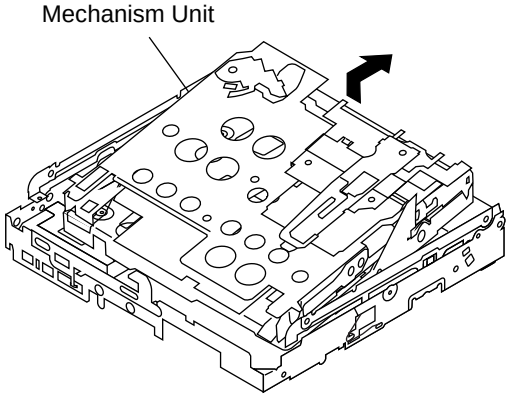

Figure 10-3

NOTES ON SCHEMATIC DIAGRAM

• Resistor:
To differentiate the units of resistors, such symbol as K and M are used: the symbol K means 1000 ohm and the symbol M means 1000 kohm and the resistor without any symbol is ohm-type resistor. Besides, the one with “Fusible” is a fuse type.

• Capacitor:
To indicate the unit of capacitor, a symbol P is used: this symbol P means micro-micro-farad and the unit of the capacitor without such a symbol is microfarad. As to electrolytic capacitor, the expression “capacitance/withstand voltage” is used.
(CH), (TH), (RH), (UJ): Temperature compensation
(ML): Mylar type

• The indicated voltage in each section is the one measured by Digital Multimeter between such a section and the chassis with no signal given.

• Parts marked with “ ⚠ ” (⊏ ニ ニ ニ ⊐) are important for maintaining the safety of the set. Be sure to replace these parts with specified ones for maintaining the safety and performance of the set.

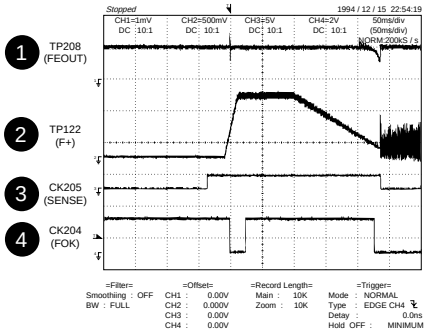
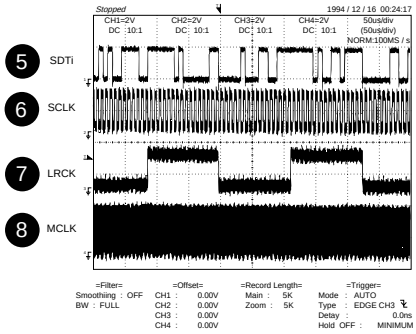
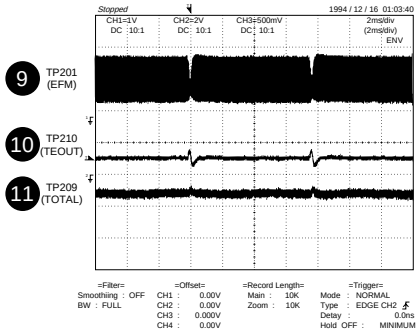
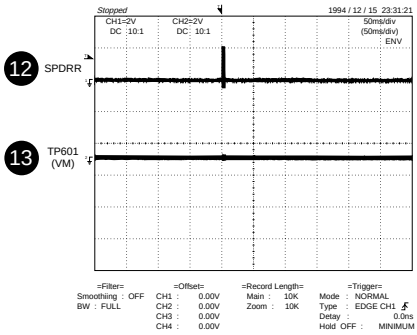
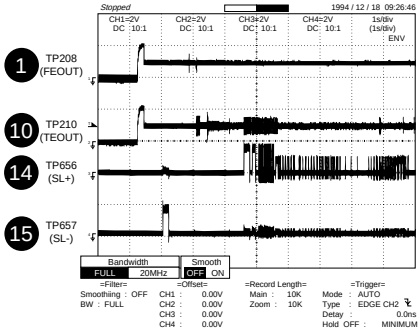
WAVEFORMS OF MD CIRCUIT

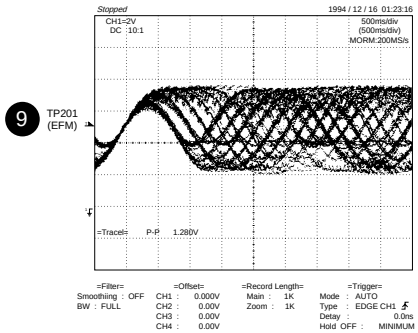


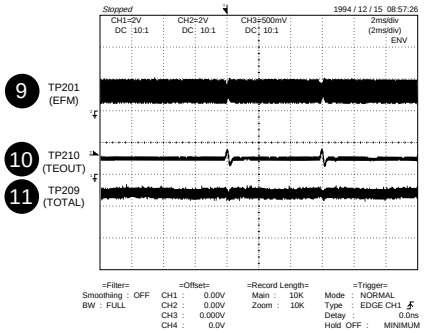


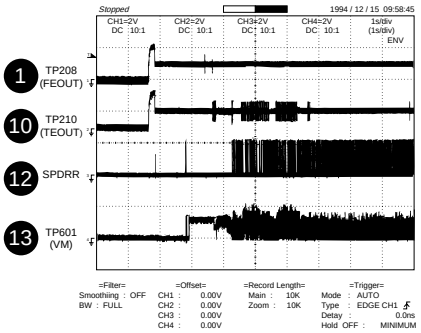


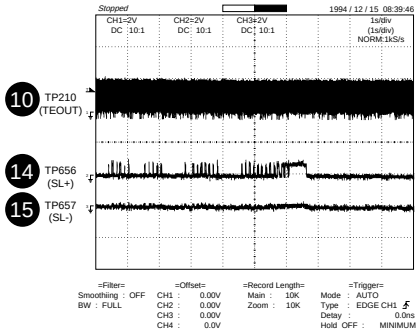


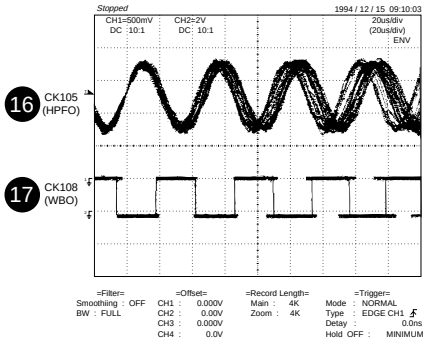


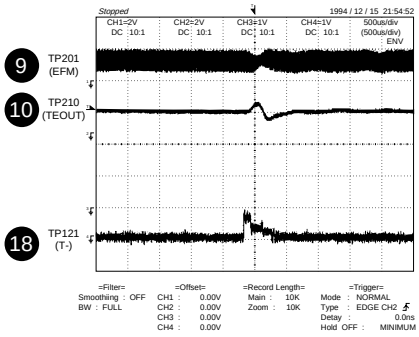




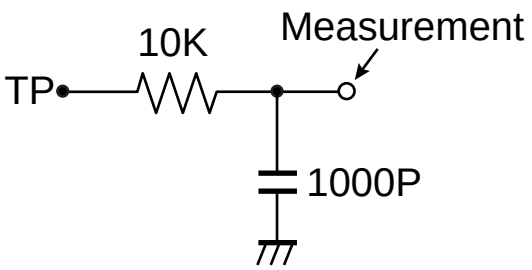








For TP208, TP209, and TP210, use the specific LPF, and observe the waveform.



When watching the EEM monitor (TP201)
Set MSL from 00H to 80H with EEPROM control setting. After completion restore 00H.

Explanation of capacitors/resistors parts codes

Capacitors

VCC ..... Ceramic type
VCK..... Ceramic type
VCT..... Semiconductor type
VC • • MF ..... Cylindrical type (without lead wire)
VC • • MN..... Cylindrical type (without lead wire)
VC • • TV..... Square type (without lead wire)
VC • • TQ ..... Square type (without lead wire)
VC • • CY ..... Square type (without lead wire)
VC • • CZ ..... Square type (without lead wire)
VC • • • • • • • • • J .. The 13th character represents capacity difference.
("J" ±5%, "K" ±10%, "M" ±20%, "N" ±30%,
"C" ±0.25 pF, "D" ±0.5 pF, "Z" +80-20%.)

If there are no indications for the electrolytic capacitors, error is ±20%.

Resistors

VRD ..... Carbon-film type
VRS..... Carbon-film type
VRN ..... Metal-film type
VR • • MF ..... Cylindrical type (without lead wire)
VR • • MN..... Cylindrical type (without lead wire)
VR • • TV..... Square type (without lead wire)
VR • • TQ ..... Square type (without lead wire)
VR • • CY ..... Square type (without lead wire)
VR • • CZ ..... Square type (without lead wire)
VR • • • • • • • • • J .. The 13th character represents error.
("J" ±5%, "F" ±1%, "D" ±0.5%.)

If there are no indications for other parts, the resistors are ±5% carbon-film type.

NOTE:
Parts marked with "⚠" are important for maintaining the safety of the set.
Be sure to replace parts with specified ones for maintaining the safety and performance of the set.
